

SafeTCard App

A versatile safety solution for lone workers, providing instant emergency alerts and continuous GPS monitoring.

Innovative safety devices for Australian lone workers

We exist to help keep people safe.

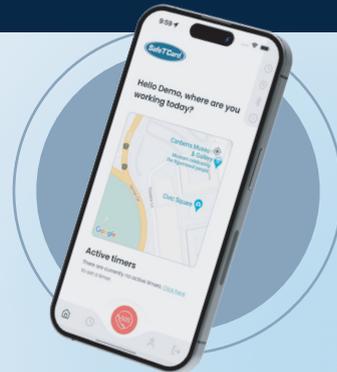

About SafeTCard

SafeTCard Australia leads the way in cutting-edge Personal Safety Devices designed to empower individuals in independent work settings. With a team possessing over 80 years of combined experience in security, emergency services, telecommunications, and the Australian Defence Force, we guarantee expertise and efficiency at every touchpoint.

Our user-centric approach centres on empowering you through education and support, helping you make informed decisions about the safety of your team. Our end-to-end solution ensures a simplified communication channel from inception to device rollout, resulting in a hassle-free experience that maximises the value of our services.

SafeTCard App

The ultimate safety app designed for instant alerts and continuous monitoring, perfect for low to medium-risk workers.

Double Tap SOS Alert

Activate alerts easily through the app or Bluetooth button.

Automatic Audio Line

Opens upon alarm activation for immediate communication.

Two-Way Communication

Direct line to our ASIAL Grade A1 Alarm Receiving Centre.

Check-In/Check-Out Process

Simplifies status updates.

STC Portal

Allows team leaders to oversee app usage.

24/7 Monitoring

Through our Grade A1 Certified Alarm Receiving Centre.

Continuous GPS Updates

Ensures real-time location monitoring.

Training Guide

Available in presentation format for easy learning.

Versatile Bluetooth Button

Add-on that can be attached to a shirt collar, added to a keyring or be worn using the watch strap. The user can activate the SOS function without the need to remove their phone from a pocket or bag, avoiding the possible escalation of a situation. It also features a Man Down function – an exclusivity SafeTCard.

We exist to help keep people safe

SafeTCard

Our Alarm Receiving Centre

Our Cairns-based ASIAL Grade A1 Alarm Receiving Centre (ARC) is reinforced by built-in, multi-level redundancies to provide unmatched reliability for our systems. This ensures the highest level of security for our clients all day, every day. Our qualified monitoring team has more than 40 years of combined experience in various services, including security, emergency services, and the Australian Defence Force. Our operators also have priority access to emergency services, securing fast and effective responses when necessary.

What Happens When a Genuine Alarm is Raised?

GPS Location Pin

Sent to our ARC, updating continuously.

Audio Line Opens

Recording starts.

Operator Access

Information file associated with the device is accessed while the operator listens to surroundings.

Escalations Begin

Emergency services are dispatched to the GPS location if necessary.

Continuous Monitoring

The audio line remains open and recording continues until the contact is deemed safe.

Full Report

Calls are documented and shared with the main contact at your organisation and your SafeTCard account manager.

Note: The device and its holder are not being monitored continuously. Monitoring information is only sent to our ARC when an alarm is raised.
